second moment $K_W$, $d = 3000$; median and 10–90% band over 20 sketches $W$ (the same $W$ for every input)

(a) synthetic: $x = H^{1/2}\xi$, $\xi_k$ i.i.d., $H \propto \mathrm{diag}(j^{-1.31})$, $\mathrm{tr}\, H = 1$, $v = 6000$

(b) CIFAR-10 (60,000 images, centered, $v = 3072$) and a Gaussian with the same covariance
